

Having previously worked as an image editor and designer for several years, I have transitioned into web development with newfound enthusiasm. I am looking forward to work as a web developer and focus on honing my skills in this exciting field and diving into the world of creating awesome web applications.

Projects

Cheffest: Full stack complete responsive web application, the food ordering app.

Technologies used: HTML, CSS, JS, React, React Query, React Hook form, Tailwind CSS and the supabase as a backend.

Project Link - <https://cheffest.netlify.app/>

Frontend Fusion: Quiz app frontend application. Application state powered with redux and react context hooks.

Technologies used: HTML, CSS, JS, React, and Redux.
